

[Functional] 404 CORS Error found on Console

Description:

When it enter on the application, trying to do a Battle between Dead Unicorn and Old Shark, opening the Console by Inspector, it is possible to see a CORS error, a 404 Error, take a look on the printscreen below:

Here are some evidence for Network too:

Steps to reproduce

1. Enter on Battle of Monsters application
2. On the first screen, it is possible to see all the monsters.
3. Open the Console by Inspector.
4. Choose “Dead Unicorn” as the monster
5. The system will choose the enemy randomly (but in my fight it was “Dead Unicorn” vs. “Old Shark”)
6. Click on the “Start Battle” button on the middle of the screen
7. On Console and Network tab, it will be possible to see the 404 Error (CORS-type)

Expected behaviour

If there is a problem on CORS, it can injure the user when it navigate on the system.

Environment

localhost
