# [Functional] Double-click on Monster make Monsters of the battle disappear
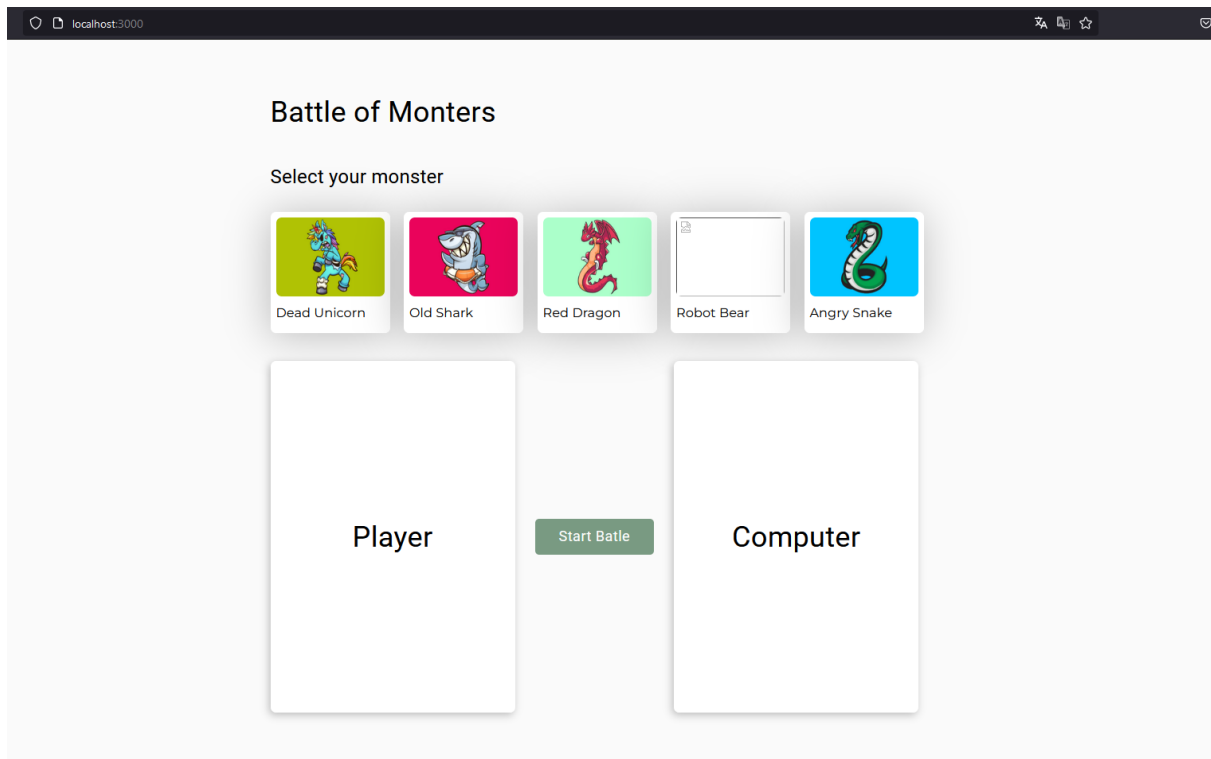

When it will choose a Monster for a Battle, if you click twice on the same Monster, the application will clean both slots of monsters.

Application printscreen:

Simple-click on the Monster:

Double-click on the same Monster:

Steps to reproduce

1. Enter on Battle of Monsters application

2. On the first screen, it is possible to see all the monsters.

3. Choose "Angry Snake" as the monster, doing a double click on it

4. Look the application is not showing any your monster even Computer monster.

Environment

localhost

Expected behaviour

A double click on a monster should not be a problem for application. It should work to choose a monster for the battle.
